Fuel Tank Draining

Warning:

Never drain or store fuel in an open container. Always use an approved fuel storage container in order to reduce the chance of fire or explosion.

Warning:

Place a dry chemical (Class B) fire extinguisher nearby before performing any on-vehicle service procedures. Failure to follow these precautions may result in personal injury.

Caution:

When performing a fuel tank draining procedure on a capless fuel system, only use the capless adapter funnel or equivalent. Using something other than the capless adapter funnel or equivalent may cause damage to the capless fuel system.

1. Insert the capless adapter funnel or equivalent into the capless fill pipe.
2. Note:
Lubricate the fuel drain hose with Transjel Lubricant or equivalent to aid in hose insertion.
3. Insert the a suitable suction hose into the fuel tank until the bottom is reached.
4. Attach a suitable suction hose to the hose used with the hand or air operated pump device.
5. Use a hand or air operated pump device in order to drain as much fuel through the fuel fill pipe as possible.
