Engine Radiator Cleaning

Warning:

NEVER spray water on a hot heat exchanger. The resulting steam could cause personal injury.

Caution:

The heat exchanger fins are necessary for good heat transfer. Do not brush the fins. This may cause damage to the fins, reducing heat transfer.

- Remove bugs, leaves, dirt and other debris by blowing compressed air through the engine side of the radiator.
- Some conditions may require the use of warm water and a mild (non caustic) detergent.
- Clean between the air conditioning condensers, and radiators.
- Clean the air conditioning condenser fins.
- Clean the radiator cooling fins.
- Straighten any damaged cooling fins.
