Fuel Tank Filler Pipe

Special Tool(s) / General Equipment

	292-00004 Fuel Tanker 100 GPM
---	----------------------------------

Removal

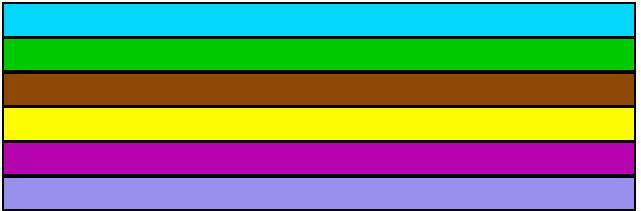

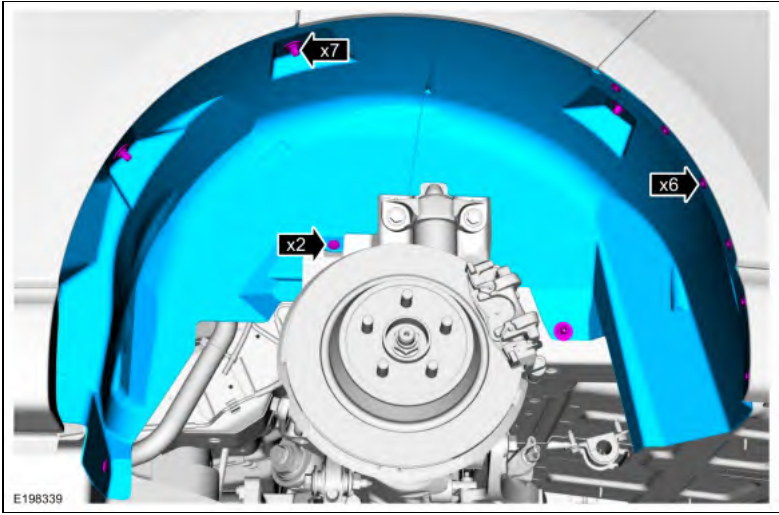

NOTE: Removal steps in this procedure may contain installation steps.

1. With the vehicle in NEUTRAL, position it on a hoist.
Refer to: Jacking and Lifting - Overview (100-02 Jacking and Lifting, Description and Operation).
2. Disconnect the battery ground cable.
Refer to: Battery Disconnect and Connect (414-01 Battery, Mounting and Cables, General Procedures).
3. **NOTE:** The supplemental refueling adapter is located in the luggage compartment.

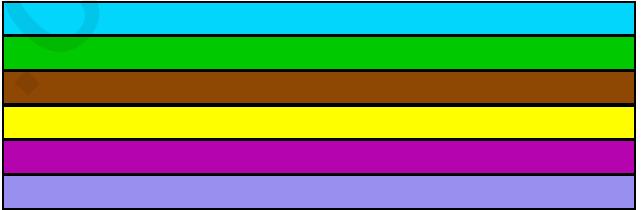

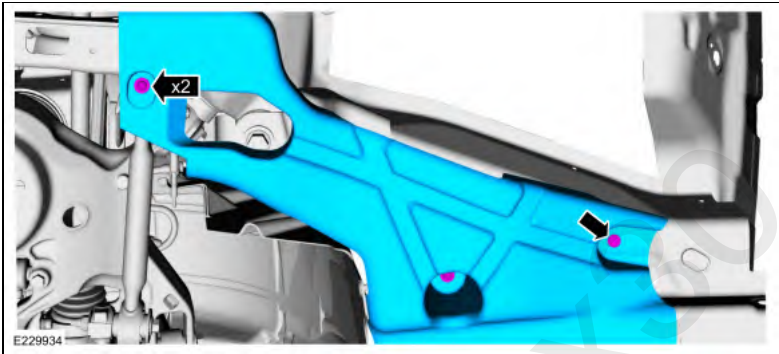

Install the supplemental refueling adapter and a length of semi-rigid fuel drain tube into the Easy Fuel^{â„¢} (capless) fuel tank filler pipe.

4. Attach the Fuel Storage Tanker to the fuel drain tube and drain as much fuel as possible from the Easy Fuel^{â„¢} (capless) fuel tank filler pipe, lowering the fuel level below the fuel tank inlet spout.
Use Special Service Tool: 292-00004 Fuel Tanker 100 GPM.
5. Remove the LHR wheel and tire.
Refer to: Wheel and Tire (204-04A Wheels and Tires, Removal and Installation).
6. Remove the retainers and the LHR wheel liner.

7. Remove the retainers and the LH shield.

8. **NOTE:** Some residual fuel may remain in the fuel tank filler pipe. Carefully drain into a suitable container.

Release the clamp and position the fuel filler pipe hose aside.
Torque: 35 lb.in (4 Nm)
