

Information and Entertainment System - Overview

Overview

NOTE: Additional information on the Ford Telematics system can be found at: www.telogis.com/ford.

Ford Telematics

Ford Telematics is a secured web-based application used to view vehicle data, create vehicle activity reports, and monitor real-time vehicle activity alerts.

Ford Telematics utilizes the telematics module to collect and send vehicle information to the web-based application.

Driver Safety And Compliance

The driver safety and compliance may provide the following data:

- Time on site
- Miles driven
- Vehicle location
- Effective utilization
- Excessive speeding events
- Airbag warning indicator
- Harsh acceleration
- Hard braking
- Seat belt use
- Optional in-cab alerts

Fleet Management

The fleet management may provide the following data:

- Command center mapping
- Landmarks and GeoFences
- 50+ analytic reports
- Real-time InSight Alerts™
- Fleet overview dashboard
- Fleet, driver, and team management
- Search for vehicle, location, and more
- Animated vehicle history
- Mixed fleet support

Vehicle Health And Fuel Consumption

The vehicle health and fuel consumption may provide the following data:

- Fuel economy
- Vehicle over-revving
- Water in diesel
- Engine coolant temperature
- Oil life remaining
- Reverse gear usage
- Diesel Exhaust Fluid (DEF) level and quality
- DPF status
