

Engine Emission Control - Component Location

6.7L Power Stroke Diesel

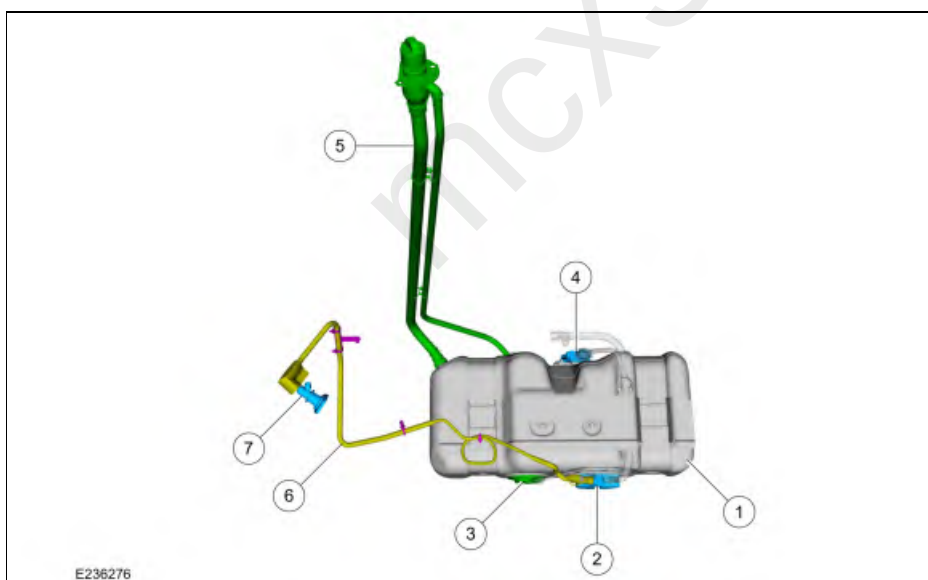

Item	Description
1	Vacuum Pump
2	EGR (exhaust gas recirculation) valve
3	EGR (exhaust gas recirculation) bypass
4	EGR (exhaust gas recirculation) cooler
5	EGR (exhaust gas recirculation) cooler inlet EGRT (exhaust gas recirculation temperature) 11 sensor
6	EGR (exhaust gas recirculation) cooler bypass valve solenoid
7	EGR (exhaust gas recirculation) cooler outlet EGRT (exhaust gas recirculation temperature) 12 sensor
8	Crankcase vent oil separator

Inboard Frame Mounted Reductant Tank

Item	Description
1	Reductant tank
2	Reductant pump and heater assembly
3	Reductant level sensor and quality module (Part of Reductant tank)
4	Reductant pump control module
5	Reductant tank filler hose
6	Reductant pressure line
7	Reductant injector

Outboard Frame Mounted Reductant Tank

Item	Description
1	Reductant tank
2	Reductant pump and heater assembly
3	Reductant level sensor and quality module (Part of Reductant tank)
4	Reductant pump control module
5	Reductant tank filler hose
6	Reductant pressure line

7	Reductant injector
