

Description and Operation

WARNINGS:

When handling the power steering fluid, always wear protective goggles and gloves made of nitril.

EYE CONTACT: Power steering fluid contains long chain alkyl amine thiophosphate. Avoid contact with the eyes. Wash hands thoroughly after handling. If power steering fluid comes into contact with the eyes, flush the eyes with plenty of cold running water for 15 minutes. Seek medical attention for any persistent eye irritation or abnormality.

SKIN CONTACT: If power steering fluid comes into contact with the skin, remove contaminated clothing. Wash affected areas of skin with soap and water. Seek medical attention for any persistent skin irritation or abnormality.

INHALED: If oil mist is inhaled, move a victim to fresh air. Keep a victim warm and at rest. Seek immediate medical attention in cases of throat irritation or coughing.

SWALLOWED: Power steering fluid contains long chain alkyl amine thiophosphate. If swallowed, drink plenty of water. Seek immediate medical attention.

Do not activate the APA system when the vehicle is on a roller rig.

Do not activate the APA system when working on any part of the steering system.

NOTICE:

When activated, the active park assist (APA) system may control the steering system.

If the power steering fluid is spilled on the paintwork, the affected area must be immediately washed down with cold water.
