

General Procedures

Check

1.
 1. Set two marks 550 mm apart on the frame area shown in the picture.
 2. Measure and note the distance 2 between vehicle frame and ground.
 3. Measure and note the distance 3 between vehicle frame and ground.
 4. Subtract 3 from 2 to calculate the difference in height between 2 and 3.
 5. Compare the sum with the specification. See "Difference in height" table.

Refer to: [Specifications](#) (204-00 Suspension System - General Information, Specifications).
